

# PROFESSIONAL SERVICES TEST CONSULTING

## DATA SHEET

### INDUSTRY-LEADING TESTING EXPERTISE

Most likely your purchase or lease of Ixia test and monitoring gear came with a strategy and plan of action on how to make the best use of it to solve both immediate and future problems. But your IT, engineering, QA, or test staff may be tied up in other projects or may not have the expertise yet to fulfill those plans.

Ixia's Professional Services Test Consulting offers immediate resources to increase and expedite your Ixia product return on investment (ROI). Working alone or together with your engineers, our engineering staff will embed Ixia tools and technology into your business processes and to get your solutions up and running quickly.

Ixia's Test Consulting comprises bundled services for best-practice recommendations, project management, and training; and design and implementation of integrated test solutions and automation. You'll gain critical access to trained experts to assist in urgent and late product development testing, customer proof-of-concepts, real-world solution demonstrations, and test lab setup, development, and on-going maturation.

Our Test Consulting packages range from installation and configuration (I&C) to custom solutions with extensive design and development. No matter what the task, our test experts are ready to assist you in taking our Ixia hardware and software to the next level within your organization. Experienced test and measurement engineers are one of your company's most valuable resources and it is essential that you maximize their productivity, along with that of your test equipment. Ixia's professional services offerings are designed to enable your engineers and accelerate your ROI in Ixia equipment.

Ixia is focused on reducing our customers' operational expenses. We provide equipment and services that proactively help you to avoid network downtime, improve network performance, and speed assistance when an issue arises. Our support services are cost effective and easy to use, and our staff are responsive and skilled.

Ixia's consulting services include:

- On-Site Service Agreements
- Consulting Assistance
- Project Management

### HIGHLIGHTS

- End-to-end testing – comprehensive integrated test solutions
- Project management – an experienced Ixia project manager manages your test effort from start to finish
- Test process optimization – solutions targeted to your specific test needs help you get the most out of your Ixia test equipment and applications
- Test automation – enables you to perform cost-effective, efficient, and repeatable lifecycle testing that enables you to deliver top-quality products
- Strategic placement – integration of testing into service delivery release lifecycle
